PROFESSIONAL SUMMARY

Dual-Cloud Senior Data Engineer with 8+ years of experience and professional certifications in AWS and Google Cloud. Expert in architecting high-availability data ecosystems, building data models and migrating legacy on-premise environments to modern cloud warehouses.

- **Scalable Data Pipeline Engineering:** Developed production-level data pipelines utilizing AWS/GCP Hybrid Data Lake and Snowflake ecosystems. Orchestrated end-to-end ELT/ETL workflows with Apache Airflow and AWS Step Function, supporting $250M in daily financial claim processing and automated incentive exchange systems.
- **BigQuery Data Modelling:** Architected centralized models to consolidate active subscription data, providing the foundational infrastructure for tracking $1.2B in annual revenue and driving business-critical decision-making.
- **Infrastructure Migration:** Worked on multiple large-scale migrations from Teradata to GCP & Hadoop to AWS Snowflake, achieving a 30% reduction in operational costs through optimized medallion architectures.
- **Performance Engineering:** Engineered a specialized Hive framework to automate the identification and deletion of invalid partitions; reduced execution time from 30 minutes to under 1 minute per table, earning the "Best of the Month" award at Accenture.

SKILLS & TECHNOLOGIES

- **Cloud Platform:** AWS, Google Cloud
- **Data Warehousing:** BigQuery, Snowflake, Hadoop
- **Programming & Scripting:** Python, SQL, Shell Script
- **Big Data Technologies:** Apache Spark, Hive, Hadoop, Hbase, Kafka
- **Orchestration:** Airflow, Control-M, Informatica, Nifi
- **BI & Analytics:** Looker Studio, Power BI
- **Developer Tools:** Github, Bitbucket, Linux/Unix

WORK EXPERIENCE

Best Buy™, Bangalore, India | Software Engineer - II (Data) | APR 2025 - PRESENT

- Designed and built a BigQuery data model consolidating active subscription customers for Best Buy, enabling tracking of $1.2B in subscription revenue and supporting ongoing data-driven business decisions.
- Analysed SAP reports to trace and document end-to-end data lineage across the medallion architecture and source RDBMS systems; rebuilt data pipelines in Google Cloud enabling full cloud migration and reducing on-prem infrastructure dependency, lowering operational costs by ~30%.
- Developed user-friendly Looker Studio Pro dashboards to visualize financial services data, enabling stakeholders to make data-driven decisions for $2B+ in annual post-audit sales.

Carelon Global Solutions, Bangalore, India | Senior Software Engineer | JAN 2021 - MAR 2025
(Formerly Legato Health Technologies, Bangalore, India)

- Designed, built, and deployed a production grade data model in Snowflake for MBM Commercial Accounting Model, run on hybrid cloud, orchestrated with Apache Airflow, processing $250M worth of finalized claims on a daily basis.
- Developed an AWS Glue-based ETL job for incremental and history data movement between internal and external S3 buckets, migrating of 200 TBs of incentives data to external vendors.
- Designed and reviewed enterprise data models with a strong focus on PHI and PII risk mitigation, and effectively communicated data solutions and design decisions to clients.

WORK EXPERIENCE (Cont.)

Carelon Global Solutions, Bangalore, India | Senior Software Engineer | JAN 2021 - MAR 2025
(Formerly Legato Health Technologies, Bangalore, India)

- Mentored new associates and delivered training on Big Data fundamentals, Bitbucket, and Data Lake architectures, while guiding them on query optimization, code reviews, migrations, and data lifecycle management to ensure data quality and security.

Accenture Inc., Bangalore, India | Software Engineer | SEPT 2017 - DEC 2020

- Optimized a Hive partition deletion tool, cutting execution time from 30 minutes to under 1 minute per table, earning the "**Best of the Month**" award at Accenture BDF.
- Successfully built a PySpark-driven data validation automation framework, cutting manual testing time by over 90 percent from 8 hours per table to under 30 minutes per table.
- Enhanced an existing ingestion framework to support multiple ingestion scenarios, enabling it to function as a generic, architecture-wide component for standardized RDBMS-to-Hadoop data ingestion.

LEADERSHIP ACTIVITIES

Toastmasters International, Carelon Orators Toastmasters Club, Bangalore

- Vice President - Membership | JULY 2023 - DEC 2023
- Sergeant at Arms | JULY 2022 - JUN 2023

CERTIFICATIONS

- Google Cloud Professional Data Engineer [FEB 2028]
- Google Cloud AI Leader [JAN 2029]
- AWS Certified Data Engineer Associate [DEC 2027]
- AWS Certified AI Practitioner [NOV 2028]

ACHIEVEMENTS

- Hackerrank SQL [5 STAR Rating]
- Hackerrank Python [5 STAR Rating]

EDUCATION

Anna University, Panimalar Engineering College, Chennai - AUG 2013 - JUN 2017
Bachelors in Electrical & Electronics Engineering - **First Class**
